Profile

As a recent Physics graduate with a passion for Python development, I am enthusiastic about leveraging my knowledge and skills in a dynamic Full Stack Developer role. I have cultivated strong analytical, problem-solving, and communication skills during my academic journey. Through hands-on projects in Python, I have gained practical insights into both front-end and back-end development. My ability to quickly learn and adapt, combined with a strong work ethic, positions me as a valuable candidate for a Full Stack Developer position.

Internship

PYHON INTERN | REJOLA IT SERVICES | Dec 28 – Mar 14

- Proficient in Python scripting.
- Used Django framework to build and maintain web applications.
- Developed responsive interface using HTML, CSS and JS.
- Developed Utilized MySQL for storing login details and task information.
- Participated in code reviews and contributed to the development of new features

Projects

TASK MANAGEMENT SYSTEM

Implemented a task management system with user registration, login, task management functions using Django.

- Implemented user registration and authentication functionality using Django's built-in authentication system. Users can register, login and logout securely.
- Views and templates for user registration, login, task listing, task creation, task updates, task deletion, and task details.
- Leveraged Django ORM for database interactions, ensuring data integrity and security.

MOVIETOS WEBSITE:

As part of my web development endeavours, I have created a responsive streaming platform called MovieTos.

- Employed HTML to meticulously structure web content, prioritizing accessibility and ensuring SEO optimization.
- Implemented modern design principles using CSS for stylish and responsive layout design, enhancing user experience.
- Leveraged JavaScript to incorporate dynamic functionalities, contributing to the platform's interactive and user-friendly features.
