PROFILE

With a successful track record in freelancing, I specialize in delivering tailored web solutions that exceed client expectations and drive business growth. As a passionate Full Stack Developer, I am proficient in React, Django, Python, HTML, CSS, JavaScript, Tailwind CSS, and MySQL. I am dedicated to developing intricate and robust solutions, emphasizing maintainable and efficient code to meet user needs and business goals. My expertise includes software architecture, continuous improvement, and adapting to new software. I focus on writing high-quality code while managing and monitoring the performance of applications, ensuring robust software solutions. My persistent desire for continuous learning and adaptation drives me to excel in full stack development, staying at the forefront of the industry.

PROFESSIONAL EXPERIENCE

Full Stack Developer - Freelance

Mar 2024 - Present

- Designed and developed responsive websites using React, HTML, CSS, JavaScript, and Tailwind CSS, with a focus on software architecture and maintainability
- Implemented RESTful APIs and integrated with backend services using Node.js and Django for robust backend solutions, ensuring effective support and troubleshooting.
- Utilized MongoDB for NoSQL database needs, ensuring efficient data storage and retrieval for scalable applications.

Git, GitHub

PROJECTS

Orbit Website 🔗

Developed a modern, responsive web application using Next.js, Tailwind CSS, and Ant Design. The project aimed to create a Token exchanging platform.

- Ensured the application was fully responsive and accessible across various devices and screen sizes using Tailwind's responsive utilities.
- Enabled real-time coin value tracking and display, providing users with up-to-date market information.
- Applied robust error handling and validation mechanisms to ensure secure and reliable transactions.

MovieTos Website 🔗

Conceptualized and implemented a responsive streaming platform showcasing proficiency in front-end development using HTML, CSS, and JavaScript.

- Utilized HTML to structure web content, ensuring accessibility and SEO optimization, while focusing on effective management and writing of clean code.
- Implemented CSS for styling and layout, incorporating modern design principles and responsive techniques to enhance user interaction.
- Employed JavaScript to add dynamic functionality, such as animations and interactive elements.
