MS UNIVERSITY
B.Sc., (Physics)
Jun 2022 | Tirunelveli.
CGPA: 7.3 / 10

AVM Hr. Sec. School
HSC
May 2019 | Tenkasi.
Percentage: 65%

PROFESSIONAL SUMMARY

As a recent Physics graduate with a passion for Python development, I am enthusiastic about leveraging my knowledge and skills in a dynamic Full Stack Developer role. I have cultivated strong analytical, problem-solving, and communication skills during my academic journey. Through hands-on projects in Python, I have gained practical insights into both front-end and back-end development. My ability to quickly learn and adapt, combined with a strong work ethic, positions me as a valuable candidate for a Full Stack Developer position.

PROJECTS

Task Management System:
Implemented a task management system with user registration, login, task management functions using Django.

- Implemented user registration and authentication functionality using Django's built-in authentication system. Users can register, login and logout securely.
- views and templates for user registration, login, task listing, task creation, task updates, task deletion, and task details.
- Leveraged Django ORM for database interactions, ensuring data integrity and security.

MovieTos website:
As part of my web development endeavours, I created a responsive streaming platform called MovieTos.

- Utilized HTML to structure web content, ensuring accessibility and SEO optimization.
- Implemented modern design principles and responsive techniques using CSS for styling and layout, and utilized JavaScript for dynamic functions.
