PROFESSIONAL SUMMARY

As a recent Physics graduate with a passion for Python development, I am eager to contribute my knowledge and skills to a dynamic Python development team. I have developed strong analytical, problem-solving, and communication skills. My hands-on experience in Python through projects has equipped me with practical insights. I am a quick learner, adaptable, and possess a strong work ethic. I am actively seeking an entry-level position to apply my academic background, coupled with my enthusiasm for Python development, to make meaningful contributions to a forward-thinking organization.

PROJECTS

Task Management System:

Implemented a task management system with user registration, login, task management functions using Django.

- Implemented user registration and authentication functionality using Django's built-in authentication system. Users can register, login and logout securely.
- views and templates for user registration, login, task listing, task creation, task updates, task deletion, and task details.
- Leveraged Django ORM for database interactions, ensuring data integrity and security.

MovieTos website:

As part of my web development endeavors, I created a responsive streaming platform called MovieTos.

- Utilized HTML to structure web content, ensuring accessibility and SEO optimization.
- Implemented modern design principles and responsive techniques using CSS for styling and layout, and utilized JavaScript for dynamic functions.
